Who I am

I am a parent of 4 children who have various additional needs and have some of my own. I have been part of various organizations from parent governor, disability consultant for my local authority and also part of the LD audits for what was then called the health care commission. I am starting law in September with the hope I can achieve legal status to represent those who have no one.

Why I want to be on the Representative Body

I would love to be involved linking in nationally to the LDE and believe in its values. It is I believe the way forward for likeminded people across the country to join together to effect positive change and equality for people.

Why I think I would do a good job

I've had various experience both in and out of services as a

parent and also professionally. I spent 2 years doing the LD audits for the health care commission and then the joint commissioning review so I've been on several aspects to the services that are involved in people's lives. I believe in people living within their own communities with paid jobs and full citizenship and want to do whatever I can to help make that happen.

Why people should vote for me

I want to help as much as I can and believe I can be part of this movement to full lives. My whole life is dedicated to this and it's at the core of everything I do. Given the chance I will be honored to work alongside others across the country to help change things for the better.
