

HUW JOHN

ORGANISATIONS & PROFESSIONALS

Hello

My name is Huw and I am the Chief Executive of Camphill Village Trust, (CVT) a charity that supports people with learning and physical disabilities to have a good life. We think having friendships, positive things to do, being appreciated and part of community is really important.

I've worked in social care for 35 years - lots of jobs, supporting homeless people, older people, and those with learning disabilities and mental health.

Being a support worker was best, enabling people to have a strong voice, learn skills, make friends and enjoy their lives - I miss those days!

I now lead CVT in finding ways for people to have stronger voices, control of their lives, and influence their charity - it's important to me.

Great support = great listening that turns into action. Our video (<https://vimeo.com/198694689>) shows how we are trying this with technology.

People from CVT enjoy being involved in LDE events and workshop, and I would like to play my part by joining your Representative Body.

Like LDE, I am not afraid to ask difficult questions and challenge people, organisations and governments about support quality, underfunding, services that don't join up and making decisions about people without involving or listening to them.

I would add my passion and energy into the LDE Representative body "pot" and be part of the team that finds different ways to get our voice as loud as possible and heard by more people.

If elected, I would be organised, listen hard at meetings, put my creative hat on and be ready to work together.

I respect how LDE works, what it stands for, and how its fighting for a louder voice - I would enjoy and appreciate the opportunity to contribute and share in the journey ahead.

Thank you,
Huw
